

~~CONFIDENTIAL~~

4 February 1960

MEMORANDUM FOR THE RECORD

SUBJECT: Attendance at Meeting in Room 3E-624, Pentagon Building,
1400 Hours, 3 February 1960

REF: Memorandum for OASD (S&L), subject: "Request for Plant and
Facility Assistance under Provisions of ODM Order 7-5",
dated 23 July 1959 (copy enclosed)

25X1A9a

1. At the request of Mr. [REDACTED], the undersigned attended the
Subject meeting. In attendance were:

Mr. Milbourn Webb, Director of Mobilization Planning, OASA
Mr. Nathaniel K. Miller, Deputy Director of Mobilization Planning, OASA
Mr. John M. Evans, Chief, Industrial Planning Management, Office of
Production Policy, OASD (S&L)
Mr. [REDACTED], Chief, TSS/PTG/Plans
Mr. [REDACTED] Planning Staff, Office of Logistics

2. The purpose of the meeting was to discuss the diversified requirements
submitted in the reference in more detail, to ascertain the proper technical
service to which the requirements could be forwarded for implementing action.
Mr. Webb questioned Mr. [REDACTED] regarding vault-type storage space with humid-
ity control, particularly, and was informed that the requirement presented was
maximum and that less than the maximum would be considered for acceptance.

3. It appeared to the undersigned that Mr. Webb was considering the poss-
ibility of separating the requirements to be spread among several technical
services components for implementation, and Mr. Evans stressed the advantages
of keeping the requirements intact because of the security implications in-
volved. Mr. Evans pointed out these advantages to Mr. Webb by citing the
planning actions performed by the Corp of Engineers in acquiring the Post Emer-
gency Printing Facilities for Agency use without knowledge of Agency interest.

4. It was disappointing to discover that Department of Defense had not
taken further planning action to make these facilities available since the re-
quirements were levied on 23 July 1959. However, while no definite declaration
was made by Mr. Webb, it would appear that the requirements will be turned over
to the Corp of Engineers for implementation with a deadline of 15 March 1960
established for presenting potential cites for further study and evaluation,
which was accepted by Mr. [REDACTED]
